

## THEIR TECH WAS NEVER MEANT FOR HER MEDIEVAL MIND.

Eliza Waite is a difficult daughter. She has her father's intellect, her mother's piety, and a desire for something more than marriage. When she is banished on accusations of witchcraft, Eliza chooses a quick death over starvation. Instead of the afterlife, she awakens to the revelation that the suffering of her village is intentional and designed to create... her.

Eliza is one of several girls bred to be an emotional input unit for a VR simulation. Their ancestors lived, suffered, and died in historically accurate conditions to entertain off-world colonists. When another girl from Eliza's community arrives, their combined wrath is a form of justice, even if only one of them survives.

Aulisyn is a part of the Antigone Effect series of standalone novels featuring strong women, futuristic technology, and a Gothic atmosphere of dread. The series explores the ethics of applied technological advances, with a focus on the social implications for women. Like true crime podcast, Antigone Effect is linked by theme, not characters. The books can be read in any order.

### AULISYN APPEALS TO READERS WHO...

- ... want to read sci-fi featuring smart women
- ... seek novels with a Gothic atmosphere of dread
- ... are fascinated by medieval society
- ... question the ethics of applied technology
- ... enjoy dual-timeline novels

### AULISYN IS NOT FOR READERS WHO...

- ... are looking for a cozy read
- ... want a happy story
- ... want "hard" sci-fi (for that, try Lorikat or Xochi)

#### ABOUT THE AUTHOR

Erzsebet holds degrees in physics and philosophy. She has over twenty years of experience as a software engineer at companies ranging from global powerhouses to scrappy startups. Erzsebet lives in Virginia with her husband a pack of wild dogs.

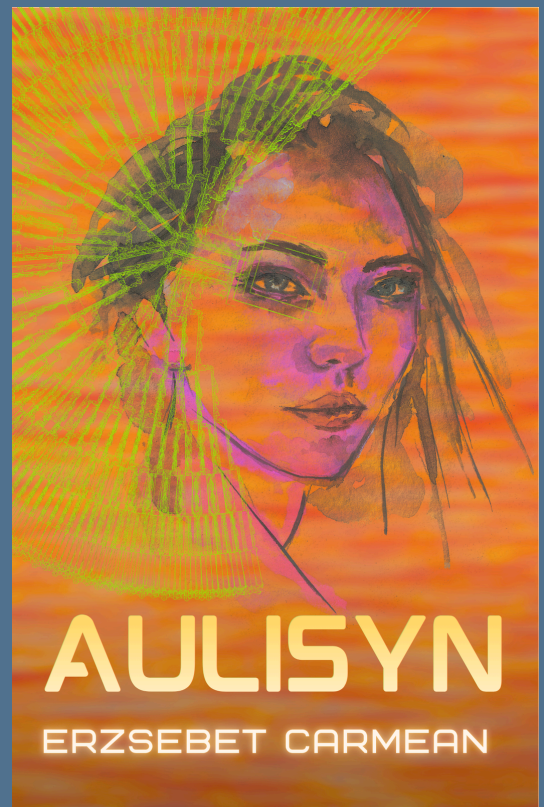

(Pronunciation of Erzsebet Carmean is **AIR**-za-bet **CAR**-mean)
